Turner Ad Sales

Following the Turner anthem video, **President of Turner Ad Sales Donna Speciale** opened the event, “We believe in pushing the boundaries. And we have the results to prove it. Turner is committed to leading the industry. We remain and always have been a trusted partner.”

She later returned to the stage to share [a client testimonial video](#) that Turner produced. “We have rebuilt Turner to put the consumer at the center and to support you. To meet your needs and expectations...We’re proud of how we’ve done it, and how well our solutions are working.” After revealing real results from client partnerships, she added, “I understand, you are tired of paying more for less. Well, now consider paying more for more.”

Turner has spent the past several years investing in new innovations, ad models, and award-winning data and content solutions through its **Turner Ignite** business unit, achieving impressive results for advertisers while keeping fans engaged with Turner’s portfolio. Here are some of the client results shared this morning:

- Turner has been a pioneer in creating new opportunities for advertisers to more efficiently and effectively reach and engage with fans through its **TargetingNOW** and **AudienceNOW** solutions. More than 130 audience-driven deals have been executed thus far, spanning every major ad category, and have significantly lowered advertisers’ target CPM by as much as **20 percent** as well as increased in-target impressions by an average of **24 percent**.
- And, recently Turner joined with Fox Networks Group and Viacom to announce **OpenAP**, the television industry’s first open platform for cross-publisher audience targeting and independent measurement. This unexpected partnership will support cross-publisher targeting and independent measurement, providing advertisers the **consistency, transparency** and **simplicity** of traditional ad guarantees within advanced audiences.
- Two years ago, Turner was an industry first-mover in announcing **reduced commercial interruptions**, first on **truTV** and later on **TNT**, which have paid off in deeper engagement with audiences, increased awareness of brands within that programming, and greater sales compared to traditional commercial breaks. truTV will significantly increase available inventory with reduced commercial interruptions which will make up 15 percent of the network’s total prime schedule. Also, additional original content from TNT will in this format beginning this fall.
- While reducing ad clutter, Turner last year launched its **Native Plus** format, providing brands the opportunity to tell more of their own story within Turner’s premium environments while also driving scale for their content in a way that only television can. Nearly every Turner network has utilized the format, totaling almost **9 hours** of traditional commercial time replaced with approximately **200 Native Plus storytelling pods**.
- Turner has also tapped into its massive social following across its brands to support true, omni-channel campaigns for advertisers. Through **Launchpad**, the company’s powerful social optimization capability, more than **375 million views** were delivered for brands in 2016. Turner is doubling down on Launchpad this year and expanding internationally to meet the global demand from marketers wanting to engage with the company’s fans across its portfolio.
